ANNEX E-2 to E/C.18/2024/CRP.7

Draft paper from the Subcommittee on Environmental Taxation for discussion and first consideration by the Tax Committee in March 2024

Inventory of Select Environmental Taxes and other Measures

This document constitutes the Appendix to the full paper of Workstream 5 on "*Other environmental measures other than carbon taxes*" presented as ANNEX E-1 to E/C.18/2024/CRP7.

Introduction

As outlined in the preceding sections of the paper on "Other Environmental Measures other than Carbon Taxes" (ANNEX E-2 to E/C.18/2024/CRP7), various types of environmental taxes can serve as a driver of sustainable development and contribute to achieve multiple goals in alignment with policy objectives. Sections 2 - 9 of the paper focused on certain specific tax types used in countries worldwide to address specific environmental challenges. Those tax types may be relevant for developing countries considering them to achieve various policy objectives.

Furthermore, globally, jurisdictions, have responded to environmental challenges with diverse taxes and fees aimed at mitigating environmental risks. To capture the variety of such measures, this section presents an inventory of further environmental taxes, environmentally-related taxes, and environmentally-motivated taxes.

Over the years, the definition of the concepts of environmental taxes and environmentally related taxes has been debated upon in academic literature as well as within the organizations such as OECD and the EU Commission. These may embody different meanings in different contexts¹.

The sole purpose of the inventory here is to come up with ideas for developing countries of possible ways to deal with specific environmental problems through measures tailored to their needs and objectives.

As in the preceding sections of the paper contained in ANNEX E-2 to E/C.18/2024/CRP7, emphasis is not on the names or conceptual labels attached to specific measures in different jurisdictions, as they may vary (tax, user fee, charge, levy, etc.), but rather on their potential effects on mitigating different environmental risks. This approach allows a targeted focus on the measures covered by the inventory without attempting to exhaustively list all measures in force in different jurisdictions globally. Notwithstanding this flexible approach, the inventory's focus specifically excludes bans or regulations addressing environmental issues. Similarly, specific country measures already covered in the preceding sections of the paper have also been excluded.

¹ See further Chapter 2 of the 2021 UN handbook on Carbon Taxation for developing Countries. The working definitions for the purpose of the Handbook are as follow. Environmental taxes: Taxes whose tax base is a physical unit (or a proxy of it) that have a proven specific negative impact on the environment. Environmentally related taxes: A compulsory, unrequited payment to general government levied on tax bases deemed to be of particular environmental relevance.

The examples listed in the inventory have been objectively selected for the solutions they are designed to offer. However, it is important to note that their effectiveness has not been evaluated within the scope of this paper.

The table below classifies the measures into 9 categories i.e. agriculture, air, biodiversity, energy, natural resources, transport, waste, water and residuals. It provides specific information, including the basis for calculation of the measure, the applicable rate and other relevant and related information to be considered when applying the specific measure, with additional web links for further information.

Sr.	Measure	Country	Tax Base	Tax Rate	Year of Imposition	General Remarks			
		Category 1 : Air							
1.	Tax on Emission of Sulphur Dioxide (SO ₂) and Nitrus Oxide (NO _X)	Italy	Per kilogram emitted from stationary sources i.e. discharge from large combustion plants	SO ₂ : EUR 0.106 NO _X : EUR 0.209	1998	 To be paid on quarterly basis Paid by operators of large combustion plants Source: <u>https://ec.europa.eu/taxation_customs/tedb/lega</u> <u>cy/taxDetail.html;jsessionid=pEMQKJ1P5g314</u> <u>aQzG-L-3opme7RgWPySRldobn_Jiqcvnn5HQEZ_!1519</u> <u>060953?id=361/1424159221&taxType=Other%2</u> <u>0indirect%20tax</u>
