

Multi-stakeholder round table 5: Domestic public resources 25.7.2024

Switzerland's comments (Benjamin Frey)

- Switzerland is fully convinced of the importance of domestic public resources and has been one of the **leading donors for capacity building related to domestic public revenue mobilization for over a decade and remains committed to provide support.**
- In this context, Switzerland approved in 2023 the **Swiss Tax Programme for Development that supports capacity building** in this area with a budget of US\$ 30 million for the period 2023 to 2028. We believe this is an important way forward in supporting development countries and hope to support further similar initiatives in the future.
