

## **STAKEHOLDER ROUND TABLE DISCUSSION ON “INTERNATIONAL DEVELOPMENT COOPERATION”**

**Thursday, 25 July 2024, 15:00 – 16:30**

The United Republic of Tanzania aligns with the submission made by previous speakers who fully support the role of International Development Cooperation in driving productivity, inclusive economic growth, and job creation in developing countries. As we prepare for the Fourth Financing for Development Conference, we are proposing the following to be considered;

- ❖ Enhancing partnerships among international organizations, governments, and non-state actors to coordinate development efforts, share best practices, and optimize resource mobilization and utilization for addressing sustainable development challenges.
- ❖ Utilizing Public Private Partnership (PPP) initiatives to focus on increasing and streamlining financial support mechanisms that direct resources to high-impact projects.
- ❖ Promoting the exchange of advanced technologies and expertise with developing countries through favorable agreements to enhance innovation capacity for sustainable development.
- ❖ Increasing support by developed countries for comprehensive training and education initiatives in developing countries.
- ❖ Ensuring development cooperation efforts prioritizing inclusivity, targeting vulnerable and marginalized populations to promote equitable growth and reduce disparities among countries.
- ❖ Developing transparent monitoring and evaluation mechanisms to ensure accountability and foster mutual trust.

**THANK YOU**
